

Jmol 12.0 new features 7/28/2010

New Jmol features introduced since the release of Jmol 11.8 on 8/26/2009 are highlighted here.
Item links are to topics in [examples-11/new.htm](#)

[Generally new capability](#)

[Graphical User Interface](#)

[New file readers](#)

[New file reading capabilities](#)

[New file output/export capabilities](#)

[Structure searching/matching](#)

[Atom properties](#)

[Jmol scripting functions and variables](#)

[New commands](#)

[New command options](#)

Generally new capability

- customizable mouse button/action bindings
- multi-touch/Kiosk capability using [SPARSHUI](#) adaptation ([U-Tube video](#))
- parallel multiprocessor capability for isosurface creation
- drag-and-drop to signed applets and the application -- see [drop.htm](#)

- model kit mode allows rapid construction of simple models
- extensive support for depiction of space groups -- see [Jmol Crystal Structure Explorer](#)

- conversion of 2D models (SMILES, JME, MOL) to 3D -- see [JmeToJmol.htm](#)
- interface to [JSDraw](#) for 2D structure input -- see [jstest.htm](#)
- interface to [Flot](#) for plotting data -- see [jmol-flot.htm](#) and [jmol-flot-energy.htm](#)

- full implementation of Daylight SMILES/SMARTS
- extension of Daylight SMARTS to [3D conformation](#)
- introduction of [Jmol biosMILES and bioSMARTS](#)
- new [JmolSmilesApplet.jar](#). See [JmolSmiles.htm](#), [JmolSmilesTest.htm](#),

- JavaScript-like flow commands and TIMEOUT
- JavaScript-like TRY/CATCH error handling

- direct reading of [Uppsala electron density maps](#)
- natural bond orbital reading/rendering

- direct logging to files using the LOG command

Graphical User Interface:

[right-edge zoom](#)

[new mouse action: LEFT-DOUBLE-CLICK-DRAG](#)

[new multi-touch interface](#)

[SET command autocompletion in console](#)

New file readers:

[CRYSTAL reader](#)
[DGRID reader](#)
[isosurface DSN6/O electron density map reading](#)
[2D MOL reader to 3D](#)
[JME reader converts 2D to 3D](#)
[direct loading of SMILES strings to 3D](#)
[direct reading of Uppsala electron density maps](#)
[VASP vasprun.xml](#)
[XPLOR electron density reader](#)

New file reading capabilities:

[drag-and-drop to signed applet and from browsers](#)
[reading of polymer\(1D\) and slab\(2D\) unit cells](#)
[loading with option to save a local version \(LOAD AS .\)](#)
[reading of Natural Bond Orbitals](#)
[reading of simple PDB trajectories](#)
[Spartan/Cygress FILTER "noOrient"](#)
[extended XYZ file format](#)
[reading specialized file data as property xxxx](#)

New file output/export capabilities:

[new LOG command](#)
[Jmol Archive Format \(.jmol\)](#)
[JVXL XML format](#)
[webExport enhancements](#)
[export of IDTF/laTeX for 3D-PDF files](#)

Structure searching/matching:

[full 3D-SEARCH SMILES/SMARTS and bioSMILES/bioSMARTS implementation](#)
[{*}.find\("SEQUENCE"\)](#)
[{*}.find\("smartsString",asArray\)](#)
[{*}.find\("SMILES, "MF"\)](#)
[{*}.find\("SMARTS", "MF"\)](#)
[SMILES stereochemistry matching](#)
[SMILES-based conformational testing and alignment](#)
[light-weight JmolSmilesApplet.jar](#)
[SMARTS atropisomer matching](#)
[MEASURE search\("..."\)](#)
[SET picking measure SEQUENCE](#)
[SHOW SMILES](#)

Atom properties:

[better RNA hydrogen bond calculation](#)
[generalized hydrogen bond calculation](#)

shapes: negative size implies ONLY
van der Waals default 23%AUTO

{xxx}.cartoon (etc.) Shapes: size testing and setting
{xxx}.eta for nucleic acids
{xxx}.polymer
{xxx}.selected
{xxx}.find("SEQUENCE")
{xxx}.find("smartsString",asArray)
{xxx}.find("SMILES", "MF")
{xxx}.find("SMARTS", "MF")
{xxx}.ionicRadius
{xxx}.theta for nucleic acids
{xxx}.volume("type")
{xxx}.x {xxx}.y {xxx}.z

Jmol scripting functions and variables:

x**y
associative arrays
acos(x)
compare()
hkl(a,b,c)
3x3 matrix math
4x4 matrix math
measure()
now()
prompt()
quaternion arrays
quaternion differences, means, and standard deviations
quaternion dot product q1.dot(q2)
symop(n)
symop(n, "...")
symop(n) * symop(m)
multiTouchServer, multiTouchClient flags
\$SCRIPT_PATH\$ script pre-processing variable

New commands:

implicit SCRIPT command
BIND
COMPARE
FIX
LOG
MAPPROPERTY
PARALLEL
PLOT
PROCESS
PROMPT
STRUTS
SWITCH/CASE

[TIMEOUT](#)
[TRY/CATCH](#)
[UNBIND](#)

New command options:

[translucent color schemes](#)
[AXES CENTER {x y z}](#)
[AXES LABELS](#)
[AXES TICKS](#)
[BOUNDBOX \\$isosurface1](#)
[BOUNDBOX SCALE x.x option](#)
[BOUNDBOX TICKS](#)
[CALCULATE HYDROGENS](#)
[COLOR BW](#)
[COLOR WB](#)
[CONNECT XX% YY% ...](#)
[DELETE HYDROGENS](#)
[DRAW BOUNDBOX](#)
[DRAW INTERSECTION \\$myIsosurfaceID PLANE|HKL](#)
[DRAW INTERSECTION BOUNDBOX PLANE|HKL](#)
[DRAW INTERSECTION UNITCELL PLANE|HKL](#)
[DRAW LINEDATA](#)
[DRAW POLYGON](#)
[DRAW SYMOP](#)
[DRAW UNITCELL](#)
[FRAME TITLE \(from file-based model names\)](#)
[FRANK OFF \(local signed applet\)](#)
[GETPROPERTY mouseInfo](#)
[GETPROPERTY SHAPEINFO](#)
[GETPROPERTY shapeInfo.isosurface](#)
[GETPROPERTY shapeInfo.pmesh](#)
[INVERTSELECTED STEREO option](#)
[ISOSURFACE ...](#)
[ISOSURFACE color MESH \[color\]](#)
[ISOSURFACE ...](#)
[ISOSURFACE ...](#)
[ISOSURFACE lattice {a b c}](#)
[ISOSURFACE "=nnnn"](#)
[ISOSURFACE ANISOTROPY generalized](#)
[ISOSURFACE CAP](#)
[ISOSURFACE color DENSITY](#)
[ISOSURFACE contour DISCRETE](#)
[ISOSURFACE contour INCREMENT](#)
[ISOSURFACE INLINE](#)
[ISOSURFACE FULLPLANE](#)
[ISOSURFACE OFFSET](#)
[ISOSURFACE SCALE3D](#)
[ISOSURFACE SIGMA](#)
[ISOSURFACE SLAB](#)
[ISOSURFACE WITHIN x.x {points}](#)

[LABELS DISPLAY](#)[LABELS HIDE](#)[LCAOCARTOON CPK](#)[LOAD \\$CCC\(C\)C -- smiles string loading](#)[LOAD @x where x is an array of file names](#)[LOAD -n \(single vibration\)](#)[LOAD DATA](#)[LOAD INLINE "JME string" and load "@x"](#)[LOAD "filename" AS "localFileName"](#)[LOAD "somefilename" 0 \(last-model loading\)](#)[MEASURE search\("..."\)](#)[MEASURE TICKS](#)[MINIMIZE ADDHYDROGENS](#)[MINIMIZE SILENT](#)[PMESH ANISOTROPY generalized](#)[PMESH OFFSET](#)[PRINT symop\(n,"..."\)](#)[ROTATE \(matrix variable\)](#)[ROTATE COMPARE option](#)[ROTATE HELIX option](#)[ROTATE TRANSLATE {x y z} option](#)[SCRIPT LOCALPATH/REMOTE PATH](#)[SELECT configuration=1](#)[SELECT CYSTINE](#)[SELECT POLYMER=n](#)[SELECT RANGESELECTED extended](#)[SELECT search\(\) -- 3D-SMARTS](#)[SELECT SPINE](#)[SELECT within\(BASEPAIR\)](#)[SELECT within\(nResidues, GROUP, atoms\)](#)[SELECT within\(POLYMER, {someAtoms}\)](#)[SELECT within\(SEQUENCE,"1-letter-code sequence"\)](#)[SET allowGestures](#)[SET allowModelKit](#)[SET allowMultiTouch](#)[SET cartoonBaseEdges](#)[SET clickCallback](#)[SET dotScale](#)[SET HIGHLIGHT](#)[SET isKiosk](#)[SET minimizationSilent](#)[SET ModelKitMode](#)[SET mouseDragFactor](#)[SET mouseWheelFactor](#)[SET phongExponent](#)[SET picking connect](#)[SET picking deleteAtom](#)[SET picking deleteBond](#)[SET picking dragAtom](#)[SET picking dragMinimize](#)[SET picking dragMinimizeMolecule -- responsive docking](#)

[SET picking invertStereo](#)
[SET picking measure SEQUENCE](#)
[set picking select STRUCTURE](#)
[set picking select POLYMER](#)
[SET pickingStyle DRAG](#)
[SET preserveState FALSE](#)
[SET quaternionFrame "A", "C", and "P" for nucleic acids](#)
[SET saveProteinStructureState](#)
[SET slabByAtom](#)
[SET slabByMolecule](#)
[SET waitForMoveTo FALSE](#)
[SET zshade](#)
[SET zshadePower](#)
[SHOW BASEPAIRS](#)
[SHOW MOUSE \[option\]](#)
[SHOW SMILES](#)
[SHOW SYMOP](#)
[SHOW TIMEOUTS](#)
[SPACEFILL RESET](#)
[TRANSLATE SELECTED x/y/z](#)
[UNITCELL TICKS](#)
[WIREFRAME ONLY and wireframe -x.y](#)
[WIREFRAME RESET](#)
[WRITE MESH](#)
[WRITE PMESH](#)
[WRITE state LOCALPATH/REMOTE PATH](#)
[ZOOM IN|OUT](#)
[ZOOMTO IN|OUT](#)
